

# Pre-Conference Workshop on Planning and Implementation of Mega Constructions: The Colombo Port City Development Project.

24<sup>th</sup> November 2021, 02.00 pm - 03.00 pm

Faculty of Technology, University of Sri Jayewardenepura, Homagama, Sri Lanka

The Colombo Port City Development Project is the largest construction project in Sri Lanka and one of a mega construction project in South Asia. It originated from the ocean reclamation and developed new land of 269Ha adjoining Colombo city. The workshop is conducting to brief the marine construction practices and other important parameters considered in the Port City construction works (environmental and economic parameters, city planning, utility services, traffic management and fisher community social issues).

## Resource Person

### Eng. Lalith Wijeratne

BSc. Eng. (Peradeniya), MIESL, Dip. Occupational Safety and Health (NIOSH),  
Dip. Information Technology (IBMT/ITMIN),  
Dip. Construction Management Executive Managers (ICTAD)

Project Director, 'Integrated Watershed and Water Resources  
Management Project (IWWRMP)', Ministry of Irrigation.

(Former Deputy Project Director in Port City Development Project)

## Workshop Content

- Architectural and Economic model of Port City Development
- Modern Technologies used for reclaimed land and Breakwater construction
- International Technological Standards followed in construction works
- Utility Services and Future Maintenance and Management of Port City
- Environment issues and Mitigation measures on Environmental Impacts
- Guidelines for proposed Building

"Technological transformation towards a smart future"

## Target Audience

Undergraduates, post-graduates, engineers, academia, and industry
